Mining in the Pittsburgh Seam - Wheeling, WV-OH, Quadrangle

Legend:
- Water treatment plant
- Mine discharge
- Sealed shaft
- Pittsburgh structure contour
- Pittsburgh coal outcrop

This mapping is a reasonable, but not exact, facsimile of the distribution of underground mine areas. Mine map outlines were compiled from a variety of original and secondary sources of varying accuracy. While the absolute accuracy of specific barrier locations, mine outlines, and unlined coal blocks may not easily be estimated, it may be considered to typically range from 50-100 meters. Mine features have been generalized, and unlined coal blocks are shown as large unlined blocks. Unlined coal blocks within mines were mapped only if their total area was greater than about 10 acres.
